"The secret to life is to put yourself in the right lighting"

Jovani

Our Vision

Our goal is to create new ways of living with unique, quality homewares that are inspired by nature and handmade to last a lifetime using traditional craft processes in sustainable and innovative ways.

We strive to inspire a like-minded conscious community and have a positive impact helping to create a world where people and nature thrive for future generations to enjoy.

Innovation

Unbound by convention, our forward-thinking outlook means we're constantly forging greener ways to run our business. We're passionate about pushing the boundaries of design, exploring the latest techniques to pioneer innovative products and practices. We use the latest technologies to find ways to improve, to align our business with the very best.

Sustainability

Great design is about more than just the products we make.
With the smallest ecological footprint possible,
we forge a path to excellence, crafting the heirlooms
of the future whilst protecting the natural world that inspires us.
We make decisions based on what's best for people and the planet.

We learn, we teach,
we develop - keeping responsibility
and sustainability at the forefront of all that we do.

Craftmanship

Exceptional craftspeople that expertly understand the art of beauty of Light.
At Vintage+ beauty of light sits at the heart of our story,
an ancient skill remastered for modern times
- bending solid wood beyond its perceived limits.

Our team of master craftspeople are driven by a shared passion
for handcrafted design, long lasting quality and an understanding
that our sustainable practises
are the key to a new way of doing things.

Timeless tones

The beauty of light is that there is a shade to suit every interior.
